NEW MOON NOTICE

New Moon in Aries, Thursday, April 20 at 12:13 am ET

Hello!

What a month have we got! Cosmically and energetically, there are about to be some radical shifts. This comes from a combination of New Moon, Solar Eclipse, and then followed the next day by Mercury Retrograde that will last until May 14th.

Then in two weeks, there will be a *lunar* eclipse. See how April is shaping up? It's got a lot of fizz and fireworks.

Let's start with the New Moon....

This is the second Aries moon that follows the Aries New Moon in March. It's as if the cosmos really wants us to have a bold, fresh start and is pushing you toward what you want— and you must embrace your desires with both arms and hold on tight!

This is the sign of the ram after all. There are no half-measures here.

There is also no doubt that the Aries sign is headstrong.

It's often regarded as the go-getter astrological sign. Aries people can often make great progress and strides in their lives by the strength of their will, which is strong.

Last month, the New Moon had us looking at creating a “treasure map” of how we wanted our lives to unfold. This month, make wishes related to the head, big decisions, and taking leadership in your life with both hands on the wheel.

Aries is rarely regarded as the touchy-feely sign and is all about being big and bold.

Learning positive assertive traits and taking initiative in your life and important matters will help you move ahead quickly, and maybe even break out of people pleasing habits or being too agreeable that at times you feel taken advantage of.

An Aries is never one to pull back, so don't be afraid to set strong boundaries if you need to.

In addition to this month's New Moon, we also have a solar eclipse the same day, followed by a lunar eclipse two weeks later. Whew!

If your emotions are on a rollercoaster you only have to look up at mother moon to know why. But it's all part of the great plan, so try to go with the flow and trust the tide.

This strength is here to help you and to propel out of any rut you may have gotten into!

If you've worked to become independent or having the courage to try new things, this month's new moon is coming to your aid.

Make your wishes about making positive forward steps, taking action in your life in the areas where you've felt held back ,and being courageous where you need to be — like learning to say "No" without wavering, apologizing, or second guessing yourself. An Aries never does. ;)

Give yourself permission to step out boldly, bravely, and brilliantly!

The ride of your life is coming up.

Let's talk about still more energy coming your way....

All solar eclipses that coincide with New Moons offer you a period where you can pursue transformation, and when you use this energy, you are able to bring yourself to a new level of growth, especially when your dreams and actions help you take big steps forward in your life and that bring you closer to your goals.

You can't afford to be 'meh' this month.

Look at April and the upcoming solar eclipse combined with the New Moon as the turbo-charged engine that can create a new state and a new way of being by zooming you ahead in life — a lot like going "warp speed" on the Starship Enterprise —and bringing you powerful change and transformation.

This is the second month when we have a sign that focuses our sights on our personal identity and creating a whole new chapter, if not a whole new story, for our lives. Just manage your energy, your body and spirit, and give yourself care as you begin a new phase of living.

Chi and crackers,

Katie
