MOVE ENERGY, MAKE MONEY

## FENGSHUI Insider

### OCTOBER HOROSCOPES

Hello!

How was your month of September? We have a new month and a new season coming up here in October. Every year this time I can't imagine that a full 10 months of the year has passed!

*Can you believe it's been the Year of the Rabbit this long already?*

This summer was long, and I had a three month break between travels. Combined with the heat, it felt like summer was a yearlong, but come October, I'll have gone to California for a week in September and then to Europe for ten days in October and then back to Vienna, Austria to *attend a ball at a palace* in November. I'm pinching myself at

this opportunity to waltz in a palace! I'm also excited to be able to visit the famed Christmas markets there in Vienna. This fall has brought me a full calendar and I'm so happy to be on the go again, but I have an important question for you toward the end of this note. 😊

### **A sparkling start**

This month offers us some hope with the 4/9 combination in the center and next month it will be 4/8 – so prosperity and money will be in the news a lot. October is always a nervous time for the stock market, but I think we will get through it just fine and will make the kick off to the holiday season extra glittery and sparkling.

### **Ho Tu combinations**

This month, there is a special combination of numbers called **Ho Tu numbers** that bring luck to the East, SE, Center, and SW sectors – and all the signs that are ruled by these sectors!

***That means the signs of the rabbit, dragon, snake, sheep, and monkey have a surprise coming of the best kind in October.***

This could include being tapped for a leadership position that comes with more money (rabbit), more prestige, money and success (dragon and snake), or opportunity to excel in business and your career (sheep and monkey).

*Be sure to carry the numbers associated with these combinations to give you extra luck.*

Rabbits should carry a 2 and 7, dragons and snakes should carry a 3 and 8 together, and sheep and monkey should carry a 1 and 6 number. Even if you simply write them on paper and carry them in your wallet, purse, or pocket, it will give you an extra bump of good fortune.

### **The sign of concern: RAT**

This month is a difficult month for rats. The energy could create a crisis of some kind. Try to spend time in self-care and avoid making major moves or changes in your life, such as major financial moves or even moving house. Be careful with health and while driving. Rats should avoid wearing red colors and stones this month. Please take extra care in October.

### **Illness energy**

As always, we have the potential for illness each month, but this month, the rooster and rabbit, rat, monkey, and sheep run an extra risk. The rooster and rabbit have the illness stars, but these are ones that affect the health and lung sector. Monkeys and sheep

host the 6 star and it rules the lungs, too, so this is a good month to be extra vigilant with health and to guard against infection.

Tigers and oxes have a sum-of-ten energy that should help put something to rest or bring a matter to completion. But you will need to keep your head down and watch details closely, but try not to complain or raise issues or you will be blamed for everything.

Horses will love this month as it will bring romance energy and a lighter feeling! Dragons and snakes will enjoy October too because they will be the belle of the ball in terms of recognition, growth, and success.

### **Updates for 2024**

I've been hearing from so many readers that they **would like an update for the Year of the Dragon and for Period 9** that we will be entering next year, so I thought I'd take a quick poll to see what you would most want to know.

It's been tough NOT writing a Success Pack, which is my custom this time of year. Although, I admit, it's been nice not being chained to my desk as I usually am (working nights and weekends for two months straight). It's hard NOT to give you an update and I want you to have a streamlined guide to the major themes and energies of the year.

However, I thought I could put together a quick guide for you that would cover your most important questions about love, money, health, plus Period 9 and a full year of flying star including a new table that would give you the whole year's worth of flying star energies on a single page....sort of a Success Pack but sized way down and simpler.

What do you think?

If you're interested in a Mini Success Pack for 2024, **I'd love to hear your thoughts with this 3 question survey:** <https://www.surveymonkey.com/r/CZLHMXT>

Wishing you a wonderful month and beautiful start to this loveliest of seasons!

=====

## **RAT**

*This is a month to spend in self-care*

I'm sorry to report this, but October has extremely difficult energy and it can show up financially, in relationships, your career or your health. Keep your ear attuned for career or business concerns that could impact your job or living. In love, if things hit a crisis moment, it may be time for counseling or move on if that's better for you. Can you take some extended time off to go sit in a cabin by the lake or rent a condo by the ocean and just read? If this is an option, I hope you'll consider it. Oddly, when things are really difficult, it's also a good time to reassess. Maybe there's something in your life that's not working and that needs to change. Whether it's addiction, a difficult relationship or time to move on from your job or business, then make that plan now. Don't do anything risky with sports, driving, or investments. Monitor health closely, maintain security and well-being. Give yourself extra care and attention. Let others help you and avoid wearing red colors. Blue and green colors will help your health.

=====

## **OX**

*October brings mixed energies, but it includes a silver lining*

Happy October, sweet Ox. You may find that this month could be a mixed bag. Watch important areas such as the feet and injuries tripping – or a trip of the tongue. Tension and annoyances could get the better of you. Focus on the positive because anger could be directed at you and even pointing out small problems make you seem angry. Avoid gossip and watch any tendencies to snap and lose your cool. Better not to say something than say something you regret. There might be some exciting money news, though. But the devil is in the details, so make sure all the details (especially promises) are put down in writing. Don't take anyone's word this month. Because October is the start of fall, get outdoors. Time spent kayaking, walking, or riding a bike will help you let

off steam and get some nice Vitamin D while you're at it. Wear red, orange, and bright colors to dispel anger.

=====

## **TIGER**

*Completion luck brings a matter to a close, but watch temper and talking*

In October you may find that you feel prickly or on edge, and your nerves may feel frayed. This makes it a good month to exercise and be outdoors. If possible, try to spend more time by yourself. If you have to be in groups, avoid gossiping, nitpicking, or complaining as others will fault you for it. A matter should come to a conclusion in October, so the silver lining is that something that's been open-ended should wrap up and it will feel good when it does. Wearing bright colors will also help to brighten your mood this month. If anything comes up that's legal or an offer is made, read the fine print, and have your attorney check it out. This month it will pay to be thorough. Watch that you don't gossip or talk out of turn. Strangely, this month also offers the potential to help you attract some nice opportunities. Walk daily to blow off steam.
