MONTHLY FLYING STAR UPDATE

NOVEMBER 2023

Hello and welcome to November!

We have a brand-new set of energies this month and they come with some lovely Ho Tu combinations that offer some glittering prospects for the month ahead. This month, there are four very promising sectors: south, west, north, and northeast that offer Ho Tu silver linings and opportunities.

Let's start with the bad news of the month first because what bad news there is has the potential to be especially damaging.

Like last month, the 9/5 combination that hit the north sector is now moving to the northwest. This is the second month we have had to weather this very difficult energy.

That makes for some tiring times, especially if the north and northwest are important areas in your home, like a bedroom, home office, kitchen, or living area.

Just as you kept the north sector quiet and undisturbed in October, you must also watch on the northwest corner in November.

Be especially wary if this is your bedroom or front door. Try to sleep elsewhere especially at the start and the end of the month when the 5/9 energy is the most potent. *Keep this area quiet and ensure there are no flames from candles or stoves and that you remove all red colors. Keep this area dark and as noise free as possible.*

This is the sector of the breadwinner and man of the house (especially older males), so this makes the combination especially worrisome – and important to remedy.

Women also have to deal with the 5 star this month.

The monthly and annual energies have changed and now the 1 star is in the women's sector, but it's bringing along the troublesome 5 star this month. Keep this area quiet and undisturbed and consider adding a Kwan Kung here to keep his watchful eye (and sword!) on the 5 Yellow. You can also place a small 5 element pagoda here to help lock up this star's problem-causing energy.

The only remaining difficulties have a silver lining. There are three other sectors with difficult energies: the southeast, the southwest, and the northeast.

Let's start with the southeast.

This is the sector of the oldest daughter and with the 3/7 combination, there is a chance that the oldest daughter will either cut off something from her life....or be cut off from something. This could be from a family member.

Arguments for the oldest daughter or by the oldest daughter could become more pronounced as could disagreements about assets, inheritances, and wills. Try to find a mediator if necessary or a very good lawyer if you need one. On the plus side, there is an energy for bringing something to completion as this is a sum of ten area. Do watch arguments because they could become violent.

Also be careful this month, though, if this is your front door or bedroom. The 7 star can bring a betrayal, accident, theft, or injury. Be careful driving. Tempers can flare too. Add blue colors and bright lights to help dispel this energy. Consider displaying an evil eye amulet here.

The southwest hosts the 5 Yellow and it's one that does well by keeping it quiet and undisturbed. For me, I have a southwest front door, so I'm glad Halloween and all the trick or treaters will not be ringing my bell after the 31st of October. Women should wear real metal jewelry as protection.

The northeast has a 7/2 combination and that could create problems with illness, but because it is a Ho Tu combination, this sector has a silver lining that could translate into benefits for children of the house.

Now, let's move on to the good news!

East-west axis houses will be blessed with good news from a beautiful front to back array of stars that will sparkle with opportunity! Be sure to spend lots of time in these corners of your home.

North-south axis houses will also have good news, though, you may have a little contentiousness to deal with (the 3 star in the south), but it comes with some sweet profits from a lovely Ho Tu combination in the south and in the north!

And the best news is....

The center sector with its 4/8 combination brings so many benefits and blessings – and they go to everyone in the house. So, if you're the man or the woman of the house, that 4/8 combo will bring a spoonful of sweetness to the month and help offset some of those difficult energies in the matriarch and patriarch corners.

Even the difficult sectors have something positive. For instance, NE-SW axis houses have the 2-5-8 combinations and those energies lined up in a row bring benefits, so there could be some very positive benefits from relationships this month.

Ho Tu benefits

Like last month, October also offers some wonderful Ho Tu benefits, so if this is your bedroom or front door, try to display the numbers here. If this is where your bedroom

falls, you can display the numbers there as well, or carry them with you to boost their luck.

The heaven sector needs quiet and close watching

Just promise me that you will keep a watch on the NW corner, especially if you have older male members of your family. This is a good time to keep tabs on any male in your family especially if they have any problems with blood pressure or heart ailments.

Mini Success Pack coming!

Thank you for answering my survey about a Mini Success Pack. You wrote so many lovely comments that made my heart sing! I have missed you so much but I will be working on a new update for the Year of the Dragon. I'll be putting it together this month and should be ready by the time the December updates are on their way to you.

Have a wonderful November and I wish my Indian readers a wonderful Diwali filled with joy and happiness. And to all my American readers, I wish you a wonderful Thanksgiving with those you love.

Chi and crackers,

Understanding the Numbers

This is a brief overview of each of the stars and what they represent to help you interpret the monthly energies above. Look at both the descriptions to understand how they might work together.

2 Star -- The 2 star is a star that creates annoyances such as lingering illness like allergies. It can create financial difficulties or problems wherever the star lands. Metal usually helps to hold down this star's negative energies.
